Recommendation letter

To Whom This May Concern,

My name is Riley Andersen, and I am proud to offer my recommendation for Bertil Kasper Kaae who I have had the pleasure to work with for 2 years at Umami Games. Bertil is an amazing game programmer and system designer!

Bertil has a great understanding of code, design and building game systems and has all around produced many fun and quirky game experiences from scratch. This also reflects in the data, where Bertil consistently has produced games with good marketing and retention metrics. He is never afraid of a challenge and is super dedicated to achieve the best result every time!

What amazed me the most about Bertil is his natural passion and talent for programming. He is one of the sharpest minds within system design, and I have personally seen him develop from a great game programmer to an outstanding game programmer in less than 2 years. He is fast, he is sharp and he is hard working!

Besides being a skilled game programmer and system designer, Bertil is also a great teammate and a cheerful spirit to be around. He has great humor and makes going to work fun, so I can only envy his future co-workers.

At Umami we would have loved to continue working with Bertil, but due to lack of raising funds we had to close Umami Games down. We wish Bertil the best in the future, and we are envious of his future employer who will get a highly skilled game programmer, a hard worker, and a great personality on their team.

With all my recommendations.

Best,

Riley Andersen
